## Projects

### At Sysgenx:

- Contributed to the Front-end development of a web application for a lighting studio in the cinema industry using Angular Material 8.2.3 ensuring a visually appealing and intuitive user interface.

### At Geekrider:

- Developed an immersive VR virtual tour website for hotels using WordPress, enabling users to explore premises in a 360-degree experience.
- Conceptualized and built high-converting landing pages and booking service websites using WordPress, optimized for seamless user experiences.
- Developed a robust WordPress website integrated with a React application, combining the power of both technologies for a dynamic user interface.
- Engineered a Gate project using WordPress to efficiently manage visitor and vehicle data for building security, ensuring a safe environment.
- Created feature-rich online tools websites using WordPress, offering users a suite of interactive and user-friendly tools.
- Integrated payment gateways seamlessly into WooCommerce websites, enabling secure online transactions and enhancing e-commerce capabilities.

## Experience

---

### Geekrider

Web Developer

Worli, Mumbai

**March 2022 - March 2024**

- Contributed to 10+ WordPress projects, including website development, customization, plugin integration, and security enhancements.
- Proficient in handling Elementor, free and paid WordPress themes and plugins, showcasing expertise in leveraging the WordPress ecosystem.
- Led the development of 2 ReactJS projects, delivering high-quality, scalable solutions.
- Implemented responsive design principles for optimal user experience across devices, ensuring cross-browser compatibility.
- Resolved critical security issues related to WordPress site attacks, implementing security measures.
- Proficient in web hosting and server management for seamless website launches and ongoing maintenance, utilizing CPanel and hPanel.
- Implemented WhatsApp integration on websites, enabling seamless communication with users and improving customer engagement.
- Developed custom solutions to send user contact form data directly to clients' email without using a database, ensuring efficient data transfer.
- Utilized HTML, CSS, JavaScript, and PHP to build efficient and user-friendly websites and web applications.
- Approached problems methodically, breaking them down into smaller components and finding creative solutions.
- Developed high-converting landing pages using HTML, CSS, JavaScript, and PHP, integrating APIs for dynamic content and functionality.
- Integrated payment gateways seamlessly into WordPress websites, enabling secure online transactions and enhancing e-commerce capabilities.
- Handled web hosting tasks, including DDOS attack mitigation, ensuring website security and uptime.
- Worked extensively on the WordPress backend, addressing security vulnerabilities, optimizing performance, and implementing custom functionalities.

### Sysgenx

Web Developer

Goregoan, Mumbai

**June 2019 - November 2019**

- Contributed to the front-end development of a web application based on Angular 8.1, showcasing expertise in the framework.
- Utilized Angular Material for designing the user interface, enhancing the overall look and feel of the application.
- Collaborated with senior developers to troubleshoot and optimize code, fostering a culture of continuous learning and improvement.
- Implemented responsive design principles for optimal user experience across devices.
