

Dear Hiring Team,

I came across your job posting and was thrilled to see an opportunity that aligns perfectly with my skills and experience. With over 2 years of experience in web development, I've successfully led projects and teams to deliver responsive, user-friendly websites using HTML5, CSS3, JavaScript, and ReactJS.

My approach to frontend development goes beyond coding — I focus on creating smooth, meaningful user experiences through strategic design and clean architecture. I'm proficient in technologies such as Bootstrap, ReactJS, UI design, and responsive design. Along with this, I have hands-on experience in backend development with PHP, MySQL, and expertise in content management systems like WordPress and Elementor.

In my previous roles as a Software Engineer Intern at Mazagon Dockyard Limited and Navi Mumbai Municipal Corporation, I strengthened my technical and project management skills. As a full-time Web Developer at Geekrider and Sysgenx, I successfully delivered multiple websites and internal tools, managing complete project lifecycles in fast-paced environments.

One of my key projects, WeldX – an AI-powered welding defect detection system – highlights my ability to blend development with innovation. Using Python, OpenCV, and the YOLO model, I built a user-friendly solution for real-time defect detection. Another notable project was a Conference Room Booking Web Application for MDL, built with React, HTML, CSS, and JavaScript to improve scheduling and productivity.

I hold a Master's degree in Computer Applications (AI & ML) from Amity University and a Bachelor's in Computer Applications from Tilak Maharashtra Vidyapeeth. My certifications in web design and development further support my expertise.

I'm genuinely excited about the opportunity to contribute my technical skills, creativity, and problem-solving mindset to your team. I'm confident that my experience and dedication to continuous learning make me a strong fit for this position.

Thank you for considering my application. I look forward to discussing how I can add value to your organization.

Warm regards,

Abhishek Ramesh Patil
